

Green Party

Amidst climate change and historic income inequality, the Green Party stands for green energy and people power. Voting Green means:

- a state bank to invest in California, not Wall Street
- publicly-owned clean, safe energy - solar and wind by distributed generation, not centralized nuclear and fossil fuels
- money out of politics, public financing of elections, ending corporate personhood
- people into politics, proportional representation, fair ballot access
- fair taxation - instead of cutting funding for schools and clinics, cut workers' taxes while taxing pollution, carbon and the rich
- living wage jobs, affordable housing, legal marriages and single-payer health care for all
- liveable cities, sustainable agriculture, nature protection
- immigrants rights
- peace not war

With enough Greens elected, we'll

- fully fund K-12, roll-back college/university tuition towards universal free public education
- end the death penalty, amend Three-Strikes, overturn the National Defense Authorization Act which allows indefinite detention of Americans without trial
- keep renters and homeowners secure, reform Proposition 13 to close corporate loopholes
- close Diablo Canyon and San Onofre and create a Solar California

Occupy your government. Vote Green.
